

DIN RAIL SINGLE PHASE 110-240 VAC SOFT START

RECOMMENDED FOR:

- PBA 30
- PBA 50
- PBA 60
- PBA 70
- PBA 120
- PBA 140
- PBW 150

Note:

The device may not be necessary on smaller generators if slo-blo line fuses are sized significantly above the running current. The soft start is necessary for fuses sized close to the running current. Because of the wide variety of fuse types it is not feasible to offer a more specific recommendation.
